

Woodlands Corporate Tuition Packages

Many people play golf just once a year as part of a corporate golf day. Others manage to fit in a round every few months. Golf is a difficult game and both beginners and those who cannot play regularly often need help getting started. Woodlands Golf Club is pleased to offer three corporate packages that golfers of all levels can enjoy and benefit from:

Package 1: 45 minute Group Clinic

\$200

A group clinic before a round can help participants set up and enjoy their day.

In the case of corporate golf days, a group clinic can be offered to all participants prior to commencing their round, or to the non-golfers as an alternative to playing a round. This way, they can still actively participate in the day, interact with colleagues and guests, and prepare for a full round next year!

Group clinics can be used to teach participants the essentials of golf or focus specifically on full swing, chipping and pitching, and /or bunkers.

Package 2: On Course Instruction

\$500

Having a golf Professional play a couple holes with each group on your corporate golf day can help improve both their game and enjoyment. The Professional can give an on course demonstration of how to get the most out of a round of golf and teach participants how to 'think' and how to play different shots on the course. This will add extra value to the day... and participants' individual golf games!

There are three methods of on course instruction to choose from:

1. Professional to play two holes with each group involved in the corporate golf day
2. Participants compete against the Professional for the longest drive on a selected hole
3. Participants compete against the Professional for nearest shot to the pin on a selected hole

Package 3: One-Hour Group Clinic PLUS On Course Instruction

\$600
